

ADJUSTABLE PRECISION SHUNT REGULATORS HM432

DESCRIPTION & FEATURES

The HM432 series Ics are here-terminal adjustable shunt regulators with guaranteed thermal stability over a full operation range. These Ics feature sharp turn-on characteristics, low temperature coefficient and low output impedance, which make them ideal substitutes for Zener diodes in applications such as switching power supply, charger and other adjustable regulators. The HM432 precision reference is offered in three band gap tolerance: 0.5%, 1.0%, 1.5%

Adjustable output voltage from Vref to 18V

Low dynamic output resistance: 250m Ω typical

Sink current capacity from 60uA to 100 mA

Typical equivalent full range temperature coefficient of 30 ppm/ $^{\circ}$ C

Application:

PC Motherboard

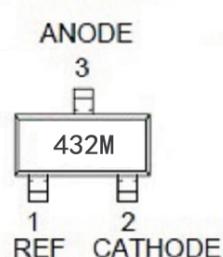

Voltage monitor

Voltage Reference

PWM down converter with reference

Charger

SOT-23

TO—92

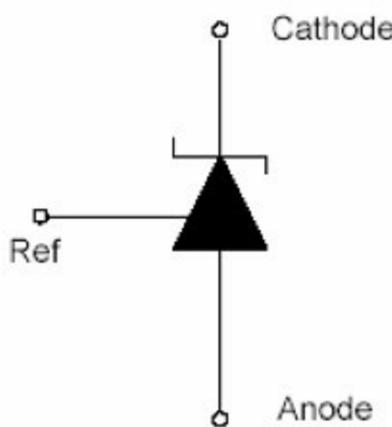

1.REFERENCE
2.ANODE
3.CATHODE
