

### Features

- Low power consumption
- Low voltage drop
- Low temperature coefficient
- Low Quiescent Current: 3uA at 6V
- Output voltage accuracy: tolerance  $\pm 2\%$

### Applications

- Battery-powered equipment
- Reference voltage sources
- Cameras, video cameras
- Portable AV systems
- Mobile phones
- Portable games

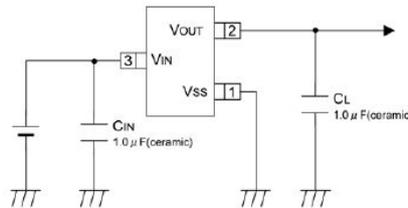

### General Description

HM6226 series are a highly precise, lower consumption, 3 terminal, positive voltage regulators manufactured using CMOS and laser trimming technologies. The series provides large currents with a significantly small dropout voltage.

The HM6226 consists of a current limiter circuit, a driver transistor, a precision reference voltage and an error correction circuit. The series is

compatible with low ESR ceramic capacitors. The current limiter's foldback circuit operates as a short circuit protection as well as the output current limiter for the output pin. Output voltages are internally by laser trimming technologies. It is selectable in 0.1V increments within a range of 1.2V to 5.0V. HM6226 series are available in SOT-23, SOT23-3 and SOT-89 packages.

### Typical Application

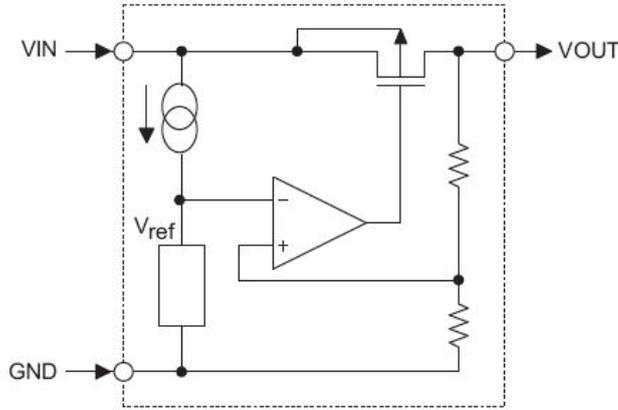

### Order Information

HM6226P①②③④

Designator	Symbol	Description
①②	Integer	Output Voltage(2.1~5.0V)
③	X	Package:SOT23
	M	Package:SOT23-3
	P	Package:SOT89A
	R	Package:SOT89B
④	R	RoHS / Pb Free
	G	Halogen Free

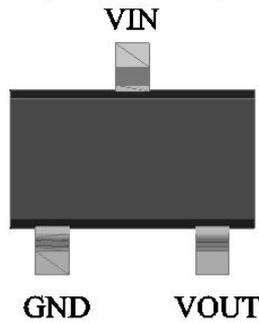

Note: "①②" stands for output voltages. Other voltages can be specially customized
